

Multi-Engine Rating – Information Package

Overview

MAG Canada offers training toward the Centreline Thrust Multi-Engine Rating on the Cessna 337 Skymaster. A multi-engine rating can be an add-on to your Private Pilot Licence and is included in your training toward the Commercial Pilot Licence.

Summary

Title:	Centreline Thrust Multi-Engine Rating
Prerequisites:	Private Pilot Licence
Schedule:	Part-Time or Full-Time
Intake:	Continuous
Duration:	1 month (Depends on student schedule)
Cost:	Approximately \$5,500

Advanced Standing

Since there is no Transport Canada minimum number of hours required for the Centreline Thrust Multi-Engine Rating, advanced standing does not apply to this program.

Program of Study

The Centreline Thrust Multi-Engine includes a flight training component. There are no Transport Canada minimum number of hours required but a typical student completes the program in 8-10 flying hours.

There is no ground school requirement for the centreline thrust multi-engine rating. Your instructor will conduct a one-on-one briefing regarding multi-engine flying techniques and human factors considerations.

Payment Schedule – Centreline Thrust Multi-Engine Rating

Due to the large costs associated with flight training, MAG Aerospace Canada does not expect students to pay tuition fees upfront or in large installments. MAG Aerospace Canada utilizes the "Pay-Per-Lesson" method, where the student settles their invoice after each lesson. Please contact us for up-to-date pricing.

Graduation

Students graduate the program when they have demonstrated adequate flying proficiency to their instructor and passed a flight test with a Transport Canada certified Flight Test Examiner.

Enrollment

Enrollment for this program is continuous, meaning students can start flight training toward the Centreline Thrust Multi-Engine Rating at any time. However, MAG Canada does not generally do these ratings between May-August because of other commitments with its Cessna 337 aircraft.

Apply to train with MAG Aerospace Canada
